The registration period is now open for the Tuenti programming contest #TuentiChallenge5

- An average of 3,000 people registered for the previous editions, of which only 10 reached the final located at the Tuenti office.
- The tests and challenges are developed and reviewed by the Tuenti engineering team itself, today focused on the development of the mobile operator of the future.
- Approximately half of the finalists receive a job offer to join the team.

Madrid, 9 March 2015. Tuenti, a Spanish company that has developed the first mobile operator with services on the cloud and a built-in communications app, today introduces the **fifth edition of their programming contest, Tuenti Challenge 5 (#TuentiChallenge5)**. The objective of this competition is to pass the 20 challenges and problems posed by Tuenti's engineering team for the purpose of discovering new talents in the computer engineering field. Also, those who achieve the best scores will be given the opportunity to join the Tuenti team, today focused on the development of the mobile operator of the future.

The four previous editions of this programming contest, which has been taking place since 2010 and where an average of 3,000 people have participated each year, have been a complete success for Tuenti, since each year the company has increased their engineering staff through the hiring of new talents from all around the world. In fact, approximately **half of the contest finalists each edition has been offered the opportunity to work with the best engineers in Spain.**

Conditions of #TuentiChallenge5
Like every year, the contest includes two clearly defined phases. A first phase where all registered people can participate and a second phase where only the 10 best will participate as finalists.

In the first phase, which will last from the 27th of April to the 4th of May, is on-line and the participants will have to solve the 20 problems posed by Tuenti's engineering team. The 50 finalists from this phase will be those that solve the greatest number of posed challenges in the shortest amount of time. The responses from the 50 initial winners will be manually reviewed by Tuenti's engineering team, who **will take into account variables such as the chosen algorithm or the clarity and quality of the implemented code.**

In the **second phase which will take place on the 28th and 29th of May at Tuenti's offices in Madrid**, the 10 best participants from the first phase will have the opportunity of spending a day working directly with the team and of participating in training sessions at the office. Also, **they will all receive a prize and some of them will be offered a job.**

Registration will begin today at 13.37 hours (GMT+1) and will remain open until the same hour on the 4th of May, at which moment the first phase of the contest will have been completed. To participate you only have to register through the **Tuenti Challenge 5 Website, contest.tuenti.net,** where you will find all the information that contestants need to know to participate as well as the legal rules of the contest.

About Tuenti

Tuenti is the Spanish technology company that has developed the first global Mobile Operator in the market with its own built-in communications mobile application. Tuenti Mobile is the first Telco 2.0 in Spain that introduces a telephone service proposal on the cloud. Focused on young people and on customer experiences, it is based on data and is completely on-line. Its app incorporates unique functionalities that are pioneer at an international level such as digital voice calls, account management, customer service or free use of the app, even with zero balance. Established in 2006, Tuenti is the most successful technology company in the history of the Internet in Spain, which has placed the mobile phone at the centre of its strategy and places a high value on talent, innovation and high value added products for its clients and users. The Tuenti team is comprised of 170 employees of different nationalities. Tuenti currently has more than 230,000 active customers in Spain and has begun launching its service in Latin America; in Mexico, Peru and Argentina.
